Dear readers,

Welcome to the second edition of the VVM Newsletter! Our newsletter will keep you up to date on recent developments in the project as well as upcoming events and new publications.

Our focus of this newsletter lies on our mid-term presentation: On 15 and 16 March you have the opportunity to learn about first results, methods and tools of the project firsthand. In order to do so, you just have to register for our virtual event: [Click here for Registration](#). In our main story you will learn more about the event.

Further news give you an insight into the 8th PEGASUS Expert Workshop that was held in February as well as the start of the data collection in the beginning of this year. We hope, you will enjoy the newsletter and we are always happy to hear your feedback and suggestions.

The VVM editorial team

Highlight

VVM's Mid-Term Presentation

With the big mid-term presentation on March 15 and 16, VVM will present first results as well as detailed insights into its developed methods and tools. In various presentations and parallel streams, the project partners will present the current project status. The event will take place as a virtual event, [registration](#) is free.

The way to Data Collection

Data acquisition plays an important role in the VVM project. It was started at the beginning of this year and will be continued in the coming weeks and months. This is another important step in the progress of the project.
